Tech Tip of the Month

Manual Programs 1 & 2

Manual Programs 1 & 2

Planning on over seeding or laying new sod? The ET2000e can be programmed to accommodate this without altering your programmed, scheduled irrigation. With this feature you can set the days to water, set up to six separate start times, choose the number of days to run, and set individual station run times.

How do I request this option?

No need, it comes standard on all ET2000e controllers. Select **Manual > Manual Program 1** or **Manual Program 2** and follow the instructions on the screen. This feature is also available on the ET2000, 500 series controller.
