

YAGI

antenna
communication
accessory

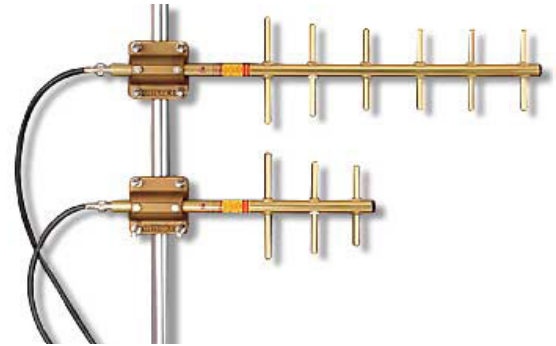

Calsense Yagi Antennas are aluminum, waterproof directional antennas typically used to extend the communications range of a specific controller location.

description

The Calsense Yagi Antennas are often recommended in situations of poor coverage. This antenna is available in the following models:

- standard 6-dBi, model SR-YAGI-6
- high gain 9-dBi, model SR-YAGI-9
- standard 7-dBi, model LR-YAGI-7
- high gain 10-dBi, model LR-YAGI-10

Note: LMR-400-DB or LMR-600-DB cable, specified separately, is required if mounting a yagi antenna. The maximum length of LMR-400-DB cable is 100-feet. Longer distances may be available with prior approval from Calsense.

technical specifications

dimensions

- Height: varies 7" to 14"
- Length: varies 13" to 41"

mounting:

- 2" U-bolt (included)

construction material:

- aluminum

warranty

- 5-year limited warranty
