Tech Tip of the Month

Need help installing, troubleshooting, or programming your Calsense controller? Does your ET Gage need servicing? All of the information you need is at your fingertips.

www.calsense.com

Installation:

Detailed, easy to read controller installation manuals are in PDF format ready to download and read through at your pace.

Programming:

You're in control. Programming is simplified by use of a model specific programming guide. Follow the step-by-step instructions that are set up in separate modules. Read the ones you need, skip the ones you don't. Having to read an instruction manual cover to cover is a thing of the past.

Troubleshooting & Servicing:

Want to "do it yourself"? Step-by-step servicing and troubleshooting manuals are available for items such as: ET Gages, Wind Gages, Rain Buckets, Moisture Sensors, Flow Meters, and of course our irrigation controllers.

Look for the Support Tab on our website. Instructions are available by Product, or by what you are trying to accomplish. Want to talk to a real person instead? Our professional technical support staff is waiting to hear from you. Call 1-(800)-572-8608 Monday thru Friday 8:00 am to 5:00 pm (PST).
